Subject: Microsoft Settlement

Enough damage has been done to the US economy and to Microsoft as a company. Microsoft has already been punished to the maximum and the company (MS) should be left alone and its time to move on. There is nothing wrong if a company is moving forward in the name and principle of innovation. There are more important things to do in life e such as feeding the hungry, national security, and how to fix the economy. Thank you. Sincerely, Lokanath Patel
